Adetoye “Toye” Oremosu

Software Development and Technology Implementation

Ashburn, Virginia | 301-675-6398 | adetoye@gmail.com
linkedin.com/in/socialsalve | loudounforward.com

Software developer with an electrical and electronics engineering background and experience in software implementation and IT support. Builds desktop applications, websites, and publishing systems, combining technical problem-solving with interviewing, research, and clear communication.

Core skills: Software development • Technology implementation • Interviewing • Digital publishing

Transmute Desktop App

Independent application project | 2026

- Developed a desktop application for converting video files and extracting audio from recordings.
- Added support for multiple files, adjustable audio and video settings, destination-folder selection, and progress tracking.
- Integrated transcription with optional speaker labels for interviews, meetings, and other recorded media.

Professional Experience

Founder and Publisher | Loudoun Forward / SocialSalve LLC 2026–Present

- Conduct business-owner interviews about their backgrounds, decisions, and practical lessons; develop the conversations into podcast episodes and material for articles and social content.
- Build and maintain an interview-led website that brings together podcast episodes, guest information, articles, and a local business directory.
- Built a connected editorial workspace to organize interviews, sources, drafts, and newsletter issues, with content status, scheduling, and review records for 416 drafts and 140 newsletter issues.
- Direct content development across four formats: website articles, newsletter sections, LinkedIn articles, and LinkedIn posts, with editorial approval before publication.
- Turned 19 interview transcript files into 16 guest content packages containing 64 editorial drafts, preserving existing work and separating material from different guests.

Founder and CEO | Impose Design, LLC March 2018–Present

- Lead podcast and digital-media projects covering immigrant experiences, community life, emotional development, and financial literacy.
- Develop show concepts, research topics and guests, and oversee recording, editing, and publication. Created and produced The Immigrant Experience with Nenelwa.
- Author and publish practical nonfiction on podcasting, personal development, and professional visibility.

Research Analyst | TitanHouse October 2016–March 2017

- Researched Fortune 500 executives and companies, compiled professional and organizational profiles, and maintained information for a structured intelligence database.

IT Network Consultant | Geeks on Call July 2015–April 2016

- Maintained networks and the website for Woodstream Christian Academy; resolved hardware, software, storage, and connectivity issues and supported website updates.

Earlier technology work includes SystemSpecs Ltd (September 2005–March 2007), supporting HumanManager software implementations and upgrades alongside consultants and client teams.
